### Professional Summary

Electronics and Broadcast Systems Engineer with over 20 years of experience in telecommunications, broadcast engineering, and industrial R&D.

Proven expertise in system installation, maintenance, and troubleshooting for complex electronic, broadcast, and networking environments. Adept at ensuring operational reliability, optimizing workflows, and supporting high-availability broadcast platforms.

Passionate about innovation, precision, and advancing product quality in technology-driven industries.

### Key Skills

- Broadcast Systems: AVID Unity, KAHUNA Switch, NEXIO, LOUTH Automation
- Networking: Cisco CCNA, IPS Cisco Tools, Network Assistant, Spectrum & Signal Analysis
- Instrumentation: Tektronix Oscilloscopes, Neutrik Audio Analyzer, Digital Audio Analyzers
- Software: SAP, Siebel, MS Office, Photoshop, Visio, AutoCAD
- Hardware & Repair: Circuit Board Rework, SMD Soldering, Camera & Audio Console Maintenance

### Professional Experience

#### Visual Inspection Technician – Product Engineering & Industrialization R&D

Intracom Telecom | Dec 2022 – Present

- Conduct visual and functional inspections of electronic and telecommunications products for R&D validation.
- Collaborate with design and manufacturing teams to identify and resolve product non-conformities.
- Maintain and calibrate inspection tools and documentation for production standardization.

#### Head-End Engineer Support – COSMOTE TV

COSMOTE TV / OTE Group | Dec 2020 – Nov 2022

- Supported live broadcast and satellite systems for high-availability television services.
- Assisted in platform upgrades and configuration for broadcast infrastructure.

- Collaborated with cross-functional technical teams to ensure uninterrupted service delivery.

### **Management Technical Support – COSMOTE TV**

COSMOTE TV / OTE Group | Nov 2018 – Nov 2020

- Managed installation, configuration, and maintenance of satellite TV and internet broadcasting systems.
- Diagnosed and resolved broadcast signal and equipment failures under time-sensitive conditions.
- Provided documentation and reporting to senior management and engineering teams.

### **Technical Sales Engineer**

AMY Digital Video | Apr 2018 – Oct 2018

- Provided consultation and technical solutions for broadcast and streaming system design.
- Delivered pre-sales and post-sales support to clients, improving satisfaction and product adoption.

### **Electronics Engineering Technician**

MEGA Channel (Teletipos S.A.) | Jul 2000 – Dec 2019

- Installed and maintained studio and field broadcast systems: Sony cameras, Studer mixers, AVID editors, NEXIO servers, LOUTH automation, Cisco networking equipment.
- Performed board-level electronic repairs using oscilloscopes, multimeters, rework stations, and analyzers.
- Ensured uninterrupted broadcast operation through proactive maintenance and rapid fault isolation.

### **Electronics Technician**

Germanos S.A. | Oct 1999 – Jul 2000

- Performed repairs on mobile phones, UPS, and consumer electronics.
- Conducted diagnostics on battery packs and circuit-level components.

### **Electronics Mechanic**

Medical System Ltd. | Nov 1998 – Oct 1999

- Installed and maintained medical imaging systems (CT, X-Ray) from Siemens, Philips, and GE.
- Repaired and calibrated circuit boards, motors, and control units.

### **Education & Certifications**

- Diploma in Radio & Television Electroacoustic Engineering – IEK Manola, Athens (1995)
- Cisco CCNA Certification – BCA College of Athens (2010)
- AVID UNITY Training – Pinewood Studios, Slough, UK

### **Languages**

- Greek – Native
- English – Intermediate (B1)

### **Additional Information**

- Strong teamwork and problem-solving mindset.
- Experienced in cross-department collaboration and R&D processes.
- Excellent hands-on technical ability and precision in repair and inspection work.
